

Enduro+ Series Charging Contacts

The Perfect Solution for Any Charging Need

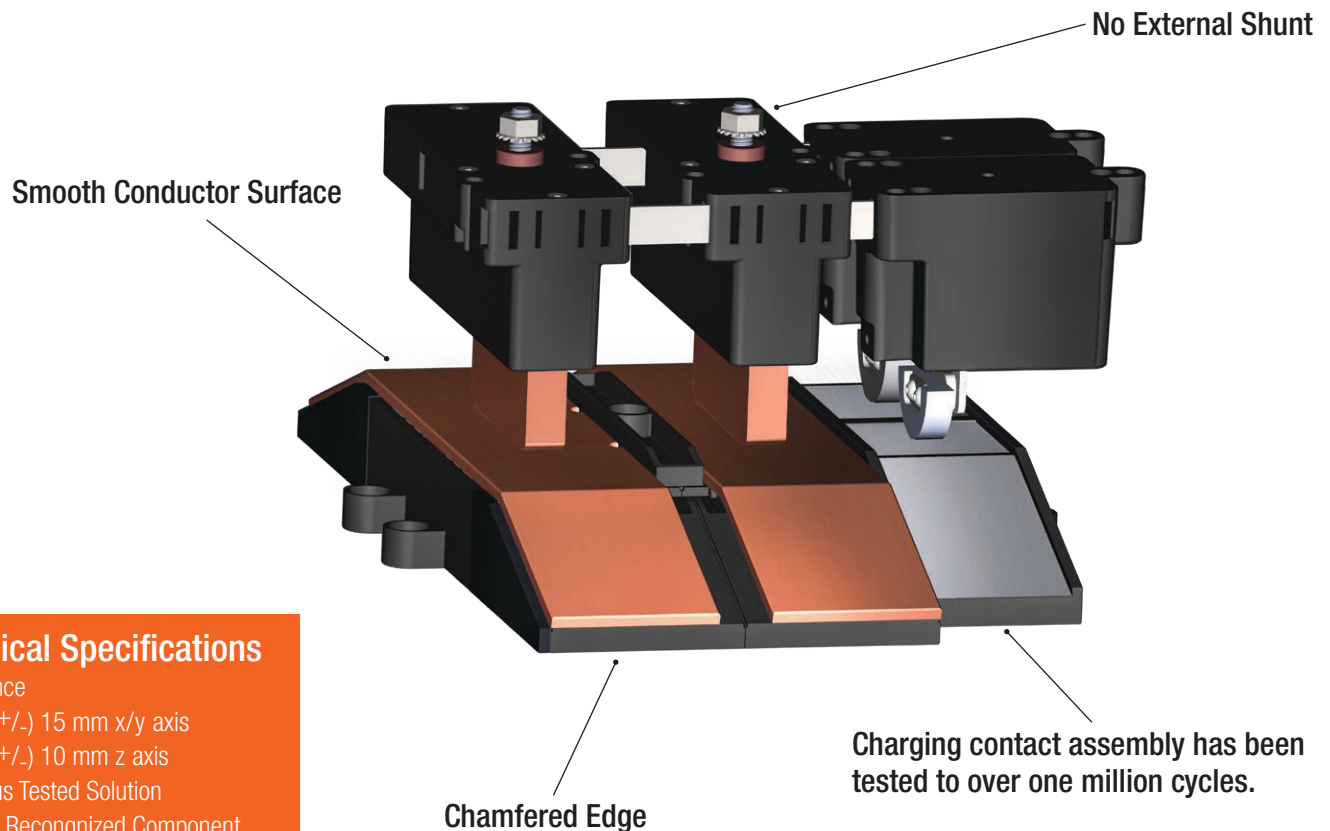

Automated vehicles have high demand for a reliable and long lasting solution. These projects may require a certain level of customization based on the project requirements.

Conductix-Wampfler's Enduro+ Series Charging Contacts offer an exceptional modular design to support any application need. The modular design offers enough customization to fit your solution without redesigning your existing project. An unparalleled shunt design, with components tested over 1 million cycles, our Enduro+ Charging Contacts provide longevity unlike anything on the market today. Conductix-Wampfler offers complete charging solutions with CANBus tested charging contacts for a long lasting solution. Our chamfered edge design allows the collector to engage the base plate on the conductive surface to provide long lasting solutions.

Enduro+ Series Charging Contacts design offers an exclusive Patent Pending Shunt and modular design tested to a Million cycles, creating a long lasting worry free solution.

Features

- Modularity
- Increased Misalignment Tolerances
- Higher Charging Rate

Technical Specifications

- Tolerance
 - (+/-) 15 mm x/y axis
 - (+/-) 10 mm z axis
- CANBus Tested Solution
- UL583 Recognized Component
- Patent Pending Shunt Design
- 100-600 Amp Solutions
